

SIDDHARTH CHILLALE

Senior Software Engineer — AI/LLM Systems & Cloud Architecture
sidep.work@gmail.com | [linkedin.com/in/schillal](https://www.linkedin.com/in/schillal) | Pune, Maharashtra, India

SUMMARY

Software engineer specializing in AI-powered and agentic systems - entity resolution, LLM evaluation pipelines, and document intelligence - built on secure, scalable cloud infrastructure. Experienced across the full R&D-to-production lifecycle, from prompt/agent design through IaC-driven deployment, with a track record of mentoring engineers and driving measurable adoption and efficiency gains.

CERTIFICATIONS

- **Claude Certified Architect – Professional, Anthropic** (08/2026 – 08/2027)
- **AWS Solutions Architect – Associate, Amazon** (09/2026 – 09/2029)

EXPERIENCE

Incubxperts Technoconsulting

Pune, IN

Senior Software Engineer

04/2026 – Present

- Own the Entity Resolution engine in production — on-demand vector embeddings with hybrid (vector + BM25) search in MongoDB Atlas, validated via an LLM-as-Judge pattern — matching external product inventories to medical recalls and lifting recall discovery by 60%.
- Lead the AI-powered document parsing and extraction feature end-to-end, with streaming outputs, observability tracing, and a continuously expanding golden evaluation dataset, driving a 30% increase in user adoption.
- Built an automated prompt evaluation and scoring framework that cut QA testing cycles roughly 5x and gave stakeholders data-driven deployment decisions across model transitions.
- Upskill the team on Infrastructure as Code and GenAI coding agents, raising feature delivery velocity while keeping the org's coding practices consistent.
- Mentor an intern building an internal tool that tracks Cursor and GitHub Copilot usage org-wide and surfaces adoption insights.

Software Engineer

01/2025 – 04/2026

- Designed and deployed secure RESTful microservices (FastAPI, Node.js) with AWS Cognito-based RBAC across a polyglot data tier (SQL Server, MongoDB), serving 150+ daily active enterprise users.
- Provisioned AWS cloud infrastructure as code and streamlined CI/CD pipelines, cutting deployment overhead by roughly 90% and improving developer velocity.
- Built a LangGraph-based B2B search and ranking engine that matched client requirements to organizational capabilities, cutting business triage time by about 70%, paired with an agentic proposal-generation workflow combining automation with SME review.

University at Buffalo

Buffalo, NY, USA

Fullstack Web Developer

09/2022 – 02/2023

- Built "Seamless Judging," a project-management SaaS tool for professors to track assignments, deadlines, and academic project reviews, cutting administrative overhead by 30%.
- Led database design and server-side development, shipping 20+ REST API services including an email-template notification system and role-based access control.
- Managed and mentored a team of 4 junior developers — streamlining onboarding and running code reviews — through project hand-off.

TECHNICAL SKILLS

- **AI Tools & SDKs:** Claude Code, Cursor, GitHub Copilot, OpenCode, LangChain, LangGraph, LangFuse, AWS Bedrock Agents
- **Programming Languages:** JavaScript (Node.js, Vue.js, React), TypeScript, Python, .NET, HTML/CSS
- **Cloud & DevOps:** AWS (IaC, Cognito), Docker, Nginx, CI/CD, Bash, ssh
- **Databases:** SQL (MySQL, PostgreSQL, SQL Server), NoSQL (MongoDB, MongoDB Atlas)
- **Tools:** Git, GitHub, Postman, PM2, MS Excel

EDUCATION

University at Buffalo, The State University of New York — Dept. of Computer Science

Buffalo, NY, USA

Master of Science, Computer Science

February 2023

Indian Institute of Information Technology (IIIT) — Dept. of Computer Science

Tiruchirappalli, TN, India

Bachelor of Technology, Computer Science

June 2021
